Allowable Subject Matter

Claims 1-8 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance: With respect to independent claim 1, the prior art of record does not disclose nor teach an illuminant which converts incident electrons into fluorescence, comprising, a nitride semiconductor layer provided on and in direct contact with the first surface of the substrate while covering the entire first surface of the substrate, the nitride semiconductor layer including a quantum well structure that emits fluorescence in response to the electron incidence having passed through the entrance surface, in combination with the remaining aspects of the claim. Since this aspect is neither disclosed nor taught in the prior art of record, independent claims 1, and dependent claims 2-8, which also incorporate this aspect, are deemed allowable over the prior art of record.

In addition, the applicant's arguments, see amendment, filed 9/22/05, with respect to claims 1-8 have been fully considered and are persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
